

ECCN Finder™ by GDM

Global Data Mining, LLC

Research Tools for Export Compliance & Control

Is your company exporting dual-use products without proper government licensing?

For decades, exporters, forwarders and government have been searching for a relationship between Schedule B numbers and ECCN numbers. The data mining experts from GDM have created a solution.

The *ECCN Finder™* brings to your fingertips the collective intelligence of the market by compiling five years of United States export transactions to inform you of potential ECCN numbers used by other trade professionals exporting similar goods.

At GDM, our goal is to help trade professionals make better decisions and make them faster. The leadership at Global Data Mining has collaborated with leading trade professionals to simplify ECCN classification, reduce research time, improve documentation, and provide a due diligence tool for red flag analysis. Here is how the *ECCN Finder™* works:

- Input a 6-digit Schedule B or HTS number
- Search five years and tens of millions of export transactions in seconds
- Review ECCN numbers used by others... weighted with relative percentages of use
- Auto-link to the exact section of the Commerce Control List for quick research on any ECCN identified by the search
- Review the Commerce Country Chart for final licensing determination

GDM's proprietary *ECCN Finder™* data is available in three levels of automation.

Research Tool or Transactional Review (Under construction)	<ul style="list-style-type: none">• Accessible through web-based research tool• Research one Schedule B or HTS number at a time• Fully automated search engines and hyper-links
Outsourced or Batch Processing	<ul style="list-style-type: none">• Send us your export data or Schedule B listing• GDM processes your data against the <i>ECCN Finder™</i> data• GDM returns results with ECCN numbers matched to your data
Embedded or Integrated Automation	<ul style="list-style-type: none">• Our IT team works directly with your IT team• GDM provides technical instructions to gain automated access to the <i>ECCN Finder™</i> data• GDM provides technical instructions for linking data directly to your enterprise software for a fully automated solution
